# **OSARO**<sup>®</sup>

# Smarter Robots, Smarter Supply Chain

Goods-to-Robot piece-picking solutions for e-commerce operations

## What our robots can do for you

We deliver goods-to-robot solutions that expand the role robots play on the warehouse floor. This is where the greatest gains in efficiency and accuracy can be achieved.

- Boost productivity
- A Mitigate labor shortages
- Shorten order cycle time
- 1 Improve order accuracy
- Adapt to changing inventory
- Operate continuously

#### **OSARO** Robotic Solutions

**OSARO**° **Robotic Bagging System** Pick-and-place robotics with bagging equipment for performance and ROI.

OSARO® Robotic Induction System
Advanced vision and accurate object
placement for sorter induction.

OSARO\* Piece Picking for AMR/ASRS
Flexible integration with no CAD
models, no pre-registration.

**OSARO**\* **Robotic Kitting System**Robots pick and precisely place an array of goods in subscription boxes.

OSARO® Robotic Depal System Mixed-case depalletization that optimizes warehouse workflow.

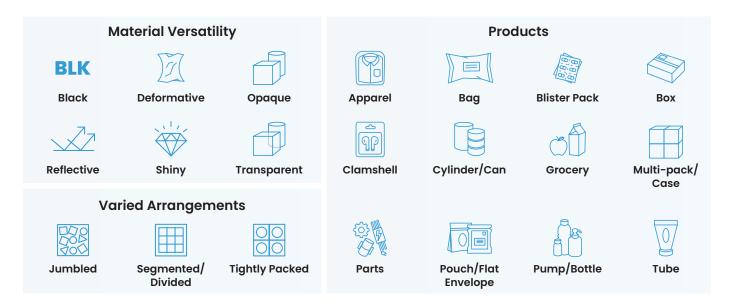

#### **OSARO®** SightWorks™

OSARO's Al-driven, machine learning vision software provides the foundation for all our products. OSARO SightWorks enables robots to see, perceive, and manage tasks previously done only by humans.

### OSARO robots can handle...

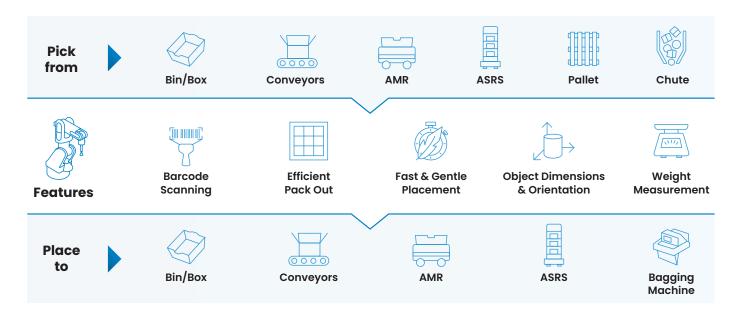

## ...and perform multiple functions

# Integrate with OSARO Robotic Solutions

Our solutions integrate with a wide range of e-commerce systems, enabling fulfillment operations to automate previously manual tasks in both new and existing facilities.

# The OSARO Difference

#### Smarter Automation

OSARO uses deep learning vision software to enable advanced pick-and-place capabilities that are accurate, simple, and fast.

- Superior robot vision and perception for high SKU inventories
- Success rates exceeding 99.6%
- Seamless API integration
- Sophisticated control algorithms for smooth, reliable motion

### **Low Risk**

We offer a business approach that reduces risk with careful planning, pricing that operationalizes costs, and highly experienced field staff who guide customers through the complex process of integration.

- Upfront assessments
- Feasibility studies to ensure success before work begins
- Robot-as-a-Service plans lower risk by operationalizing costs, versus costly capital outlays

### **Hypercare**

We deliver a sustained
Hypercare service
program to meet
customer needs from
exploration through
deployment. We
collaborate to optimize
performance for your
specific operation.

- Performance monitoring
- Step-by-step testing
- Quarterly business reports
- Sustainability plan
- Specification support

# Find a custom solution for your operation.
